Natural Avalanche Upper Republic Creek

Republic Creek
Cooke City
3/16/2020
Code
SS-NC-R1-D1.5-I
Elevation
10000
Aspect
NE
Latitude
44.98550
Longitude
-109.94100
Notes

A small slab avalanche in the upper valley. A northeast aspect around 10,000'.

Also, there appeared to quite a bit more (thin) storm slab activity that occurred up Republic Creek yesterday (both east and west aspects). I'd hypothesize that most of the slides that ran yesterday, were on the density change within the new snow.

Number of slides
1
Number caught
0
Number buried
0
Avalanche Type
Soft slab avalanche
Trigger
Cornice fall
R size
1
D size
1.5
Bed Surface
I - Interface between new and old snow
Problem Type
New Snow
