Cooke City
3/25/2020
Code
SS-R2-D1.5
Latitude
45.02020
Longitude
-109.93800
Notes

From email on 3/27/2020 : "natural slab avalanche I observed today near Cooke City. An easterly aspect around 9,400'. I'd estimate the crown to be 2-3' deep and about 100' wide. Looks like it was triggered by a cornice fall (2-3 days ago?)."
