Large Collapse on hard wind slab in Hyalite

Flanders Creek Northern Gallatin 12/22/2019 Code HS-AF-O Elevation 7900 Aspect NW Latitude 45.43880 Longitude -110.92600 Notes

Ice climbers had a very hard <u>wind slab collapse</u>, crack and "whumph" while approaching a climb in Flander's drainage. Winds were blowing strong and drifting snow. They noted their tracks were filled in when they left, and fresh drifts cracked when isolated.
