Activity
Snowboarding

Hey guys,
I am doing a little bit of testing for the email system. I have sent about 50 to myself! but have spared y'all, until now. I need to continue the testing regime, making sure reply-to address works, etc.

Check out the 'Create Avalanche Activity Item from this snow obs' link, and the 'make image node from IMG_34.JPG or whatever image'.
I think only one of those was there before.
These images are not directly uploaded to gmail account anymore. So if you want an image (e.g. for a print or design version) , the best is to save it to your local HD, or make a note of which image node it is.

Good luck!
