Top of Bradley's meadow

Date Thu, 12/24/2020 - 12:30 Activity Skiing

Booted up Bradley's and did a hasty extended column with a ski tail and a shovel when it felt hollow. ECTP 1 on a 27deg east face.

Got shooting cracks at the top of the meadow but not steep enough to get moving.

Stayed on low angle.

Region Bridger Range Location (from list) Bradley Meadow Observer Name Jeremiah Johnson
