Cornice triggered avalanche in Divide Basin, Hyalite

Divide Cirque Northern Gallatin 1/4/2021 Code C-NC-R2-D2 Elevation 9600 Aspect E Latitude 45.39340

Longitude -110.96900 Notes

A backcountry skier wrote, "...observed a fairly large, <u>cornice</u>-triggered avalanche on an east <u>aspect</u> at 9600' that looked to be several hours old. The crown was 40-100 cm deep, and it looked like it failed about 20 cm into the facets that make up the lower half of the snowpack in this region."
