

Natural Avalanches, Thunderer Mountain

COOKE CITY

Cooke City

2/21/2021

Code

SS-N-R2-D2

Elevation

9700

Aspect

W

Latitude

45.02020

Longitude

-109.93800

Notes

From email: "I saw some older [slab](#) avalanches on The Thunderer mountain, in northeast YNP (observed today). These avalanches happened on westerly aspects around 9700'. I'd hypothesize that they happened in correlation with the very strong westerly winds that happened around Feb. 21-22."

Number of slides

2

Number caught

0

Number buried

0

Avalanche Type

Soft slab avalanche

Trigger

Natural trigger
