

Thin wind slab on Blaze Mtn.

Northern Madison

2/25/2022

Code

HS-AS-R1-D1

Latitude

45.36880

Longitude

-111.41200

Notes

Small skier triggered slides on Blaze Mountain.

From obs on 2/25/22: "I did get a couple new wind pillows to break and move somewhat forcefully while walking near the summit of Blaze, in an area with a very shallow snowpack. These were sitting on top of some large, old facets, and while they were relatively small, they definitely could have knocked me down in more consequential terrain."
