

Skier triggered loose snow in Beehive Basin

Beehive Basin

Northern Madison

2/4/2024

Code

L-AS-R1-D1

Elevation

9400

Aspect

W

Latitude

45.33430

Longitude

-111.38600

Notes

Multiple natural avalanches and at least one suspected human triggered dry loose in Beehive Basin. Most naturals appeared to have run either last night or yesterday (2/3/24), with a couple potentially older slides. New snow and rapidly changing cloud cover/depth perception made it a bit hard to be sure. Suspect one skier triggered dry loose in W facing trees. One of the W-facing chutes further up valley was also observed to have a crown line at approximately 9000' (no photo)
