

On our drive home we saw, what I assume were, natural wind-slab avalanches on Quarter Saddle (looked like a cornice collapse) and in Argentina Bowl. Bridger Peak was obscured by heavy wind-loading. Photo: GNFAC

Advisory Region

Bridger Range

Longitude

-110.93W

Latitude

45.83N

Avalanche Details: [Wind-Slab Avalanches in Bridger Range](#)

Bridger Range, 2024-03-27
