

Some faceting near IP

Date

Sun, 11/10/2024 - 09:35

Activity

Snowmobiling

Quick loop on the sleds around Black Canyon. 50 cm (~20 inches) of snow at 8000'. Good layer of [surface hoar](#) on top, and the upper part of the snowpack is starting to facet. Non-issue for now with snow coming this week that could double the snowpack.

South facing slopes have some damp snow.

Region

Island Park

Location (from list)

Black Canyon
