

Strong Winds and Fresh Drifts on Hyalite Peak

Date

Sat, 11/30/2024 - 16:50

Activity

Skiing

We toured toward Hyalite Peak and didn't go to the ridge because the wind was blowing so hard. We didn't observe any natural avalanches and only got localized cracking. The snow was still soft in the trees.

Region

Northern Gallatin

Location (from list)

Hyalite Peak

Observer Name

Maddie Beck
